**SPOT REPORT #4**  
**TROPICAL STORM HANNA**  
**0900 Hours, 7 September 2008**

**Summary:**

TS Hanna continues to move rapidly northeast and away from the region this morning. A trailing frontal boundary is forecasted to become nearly stationary across North Carolina through Monday. Meanwhile high pressure builds into the mid Atlantic region through Monday. A stronger cold front crosses the region late Tuesday. High pressure builds into the region Wednesday. In shortest of terms, will carry patchy fog through 12z or so in grids due to combination of wet ground as winds have decoupled in areas away from the water. Tropical air mass remains in place today over the region in the wake of TS Hanna. Today's forecast is expected to be a sunny with temperatures in the mid-to-upper 80s.

**River Flood Warnings:**

- Dan River at South Boston until Sunday evening; minor flooding is occurring; flood stage is 19 feet and river crested near 22 around 0100 this morning and began receding around 0500 at 21.3 feet
